

SAFETY DATA SHEET

1. Identification

Product identifier	RAP 200®
Other means of identification	Not available.
Recommended use	Not available.
Recommended restrictions	Workers (and your customers or users in the case of resale) should be informed of the potential presence of respirable dust and respirable crystalline silica as well as their potential hazards. Appropriate training in the proper use and handling of this material should be provided as required

Manufacturer/Importer/Supplier/Distributor information

Manufacturer		
Company name	CETCO	
Address	2870 Forbs Avenue	
	Hoffman Estates, IL 60192	
	United States	
Telephone	General Information	800 527-9948
Website	http://www.cetco.com/	
E-mail	safety.data@amcol.com	
Emergency phone number		
Americas	1.866.519.4752 (US, Canada, I	Mexico) 1 760 476 3962

under applicable regulations.

2. Hazard(s) identification

Physical hazards	Not classified.
Health hazards	Not classified.
Environmental hazards	Not classified.
OSHA defined hazards	Not classified.
Label elements	
Hazard symbol	None.
Signal word	None.
Hazard statement	The mixture does not meet the criteria for classification.
Prevention	Observe good industrial hygiene practices.
Response	If exposed or concerned: Get medical advice/attention.
Storage	Store away from incompatible materials.
Disposal	Dispose of waste and residues in accordance with local authority requirements.
Hazard(s) not otherwise classified (HNOC)	None known.
Supplemental information	Not applicable.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
ASPHALT	PETROLEUM ASPHALT	8052-42-4	30 - < 40
CALCIUM BORATE		12007-56-6	10 - < 20
CALCIUM CARBONATE	LIMESTONE	1317-65-3	10 - < 20
QUARTZ	CRYSTALLINE SILICA, QUARTZ SILICA (QUARTZ)	14808-60-7	3 - < 5
Other components below reportable levels			30 - < 40

Other components below reportable levels

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures	
Inhalation	If exposed to excessive levels of dusts or fumes, remove to fresh air and get medical attention if cough or other symptoms develop.
Skin contact	Wash off with warm water and soap. Get medical attention if irritation develops or persists.

Material name: RAP 200®

Eye contact	Immediately flush eyes with plenty of water for at least 20 minutes. Get medical attention if irritation develops or persists.
Ingestion	If swallowed, rinse mouth with water (only if the person is conscious). Ingestion may cause transient irritation of throat, stomach and gastrointestinal tract. Consult a physician if necessary. Give several glasses of water.
Most important symptoms/effects, acute and delayed	Direct contact with eyes may cause temporary irritation.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
5. Fire-fighting measures	
Suitable extinguishing media	Foam. Dry powder. Dry chemical, CO2, water spray or regular foam. Carbon dioxide (CO2).
Unsuitable extinguishing media	Water. Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment	Firefighters should wear full protective clothing including self contained breathing apparatus.

Special protective equipment and precautions for firefighters	Firefighters should wear full protective clothing including self contained breathing appara
Fire-fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Move containers from fire area if you can do so without risk.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Sweep up or gather material and place in appropriate container for disposal. Avoid dust formation. For waste disposal, see section 13 of the SDS. Reduce airborne dust and prevent scattering by moistening with water. Containment of this material should not be necessary.
Environmental precautions	No special environmental precautions required.

7. Handling and storage

Precautions for safe handling
 Do not handle or store near an open flame, heat or other sources of ignition. Keep formation of airborne dusts to a minimum. Provide appropriate exhaust ventilation at places where dust is formed. Heat only in areas with appropriate exhaust ventilation. Do not breathe dust. Avoid prolonged exposure.
 Conditions for safe storage, including any incompatibilities
 Do not handle or store near an open flame, heat or other sources of ignition. Keep formation of airborne dusts to a minimum. Provide appropriate exhaust ventilation. Do not breathe dust. Avoid prolonged exposure.
 Keep in a dry, cool place. Keep away from heat, sparks, and flame. Store in original tightly closed container. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Туре	Value	Form
CALCIUM CARBONATE (CAS 1317-65-3)	PEL	5 mg/m3	Respirable fraction.
		15 mg/m3	Total dust.
Additional components	Туре	Value	Form

9. Physical and chemical properties

Appearance	Fabric/Mat
Physical state	Solid.
Form	Solid. Roll.
Color	Black.
Odor	Petroleum
Odor threshold	Not available.
рН	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	700 °F (371.11 °C) estimated
Flash point	283.7 °F (139.8 °C) estimated

Material name: RAP 200®

Evaporation rate	Not available.
Flammability (solid, gas)	Not available.
Upper/lower flammability or exp	losive limits
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	905 °F (485 °C) estimated
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Density	1.00 g/cm3 estimated
Flammability class	Combustible IIIB estimated
Percent volatile	0 % estimated
Specific gravity	1 estimated
10. Stability and reactivity	
Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	This is a stable material.
Possibility of hazardous reactions	Will not occur.
Conditions to avoid	Heat, flames and sparks. Avoid temperatures exceeding the flash point. Contact with incompatible

 materials.

 Incompatible materials
 Acids. Fluorine.

 Hazardous decomposition products
 Irritating and/or toxic fumes and gases may be emitted upon the products decomposition.

11. Toxicological information

Information on likely routes of exposure

Ingestion	Expected to be a low ingestion hazard.
Inhalation	Prolonged inhalation may be harmful.
Skin contact	Not available.
Eye contact	Direct contact with eyes may cause temporary irritation.
Symptoms related to the physical, chemical and toxicological characteristics	Direct contact with eyes may cause temporary irritation.

car asp liqu or i wh be Co	adequate evidence that undiluted, air-refined asphalt is carcinogenic to animals. There is only nited evidence that undiluted, steam-refined and cracking-residue asphalt are carcinogenic to imals. Additionally, IARC has concluded that there is inadequate evidence that asphalts alone e carcinogenic to humans.
	biologed and repeated skin contact with some solvent extracts of asphalts have produced skin ncer in animals. IARC has concluded that there is sufficient evidence for the carcinogenicity of phalt extracts in animals. Therefore, "cutbacks" (asphalts that are diluted, dissolved, or uefied in hydrocarbon solvents) may also be implicated as potentially carcinogenic. While brief intermittent skin contact with this type of product is not expected to cause harm, those workers to do not practice good personal hygiene and who are exposed repeatedly via skin contact may at risk.
bao stu	ondensed asphalt fumes, which are generated under laboratory conditions and are chemically ferent from those found during typical asphalt operations, have been reported to cause cterial mutations. However, inhalation of asphalt fumes by laboratory animals, during controlled udies, did not produce lung cancer. Additionally, human studies have not established a link tween lung cancer and asphalt fume exposure to date.
nat	is product may contain trace amounts of polynuclear aromatic hydrocarbons (PAHs) as turally occurring constituents of crude oils from which asphalt is derived. Some PAHs have en shown to be carcinogenic after prolonged or repeated skin contact in laboratory animals.
IARC Monographs. Overall Evalu	
ASPHALT (CAS 8052-42-4)	2B Possibly carcinogenic to humans.
QUARTZ (CAS 14808-60-7)	3 Not classifiable as to carcinogenicity to humans. 1 Carcinogenic to humans.
US. National Toxicology Program	m (NTP) Report on Carcinogens
QUARTZ (CAS 14808-60-7)	Known To Be Human Carcinogen.
	is product is not expected to cause reproductive or developmental effects. t classified.
Material name: RAP 200®	

Specific target organ toxicity - repeated exposure	Not classified.
Aspiration hazard	Not available.
Chronic effects	Prolonged inhalation may be harmful. Prolonged exposure may cause chronic effects. Some of the components of this product are hazardous in the respirable form. However, because of the physical nature of this product, dust generation is not expected. Overexposure to dusts may result in pneumoconiosis, which can lead to fibrotic changes in the lung tissue, or silicosis, a respiratory disease caused by inhalation of crystalline silica dust, which can lead to inflammation and fibrosis of the lung tissue. Occupational exposure to nuisance dust (total and respirable) and respirable crystalline silica should be monitored and controlled.
Further information	Information given is based on data on the components and the toxicology of similar products. No data is available on the product itself.
12. Ecological information	

0		
Ecotoxicity	This product has no known eco-toxicological effects.	
Persistence and degradability	No data is available on the degradability of this product.	
Bioaccumulative potential	No data available.	
Mobility in soil	No data available.	
Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.	

13. Disposal considerations

Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site.
Local disposal regulations	Dispose in accordance with all applicable regulations.
Hazardous waste code	The waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container is emptied.

14. Transport information

DOT

Not regulated as dangerous goods.

IATA

Not regulated as dangerous goods.

IMDG

Not regulated as dangerous goods.

Transport in bulk according to Not available. Annex II of MARPOL 73/78 and the IBC Code

15. Regulatory information

US federal regulations This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

OSHA Process Safety Standard: This material is not known to be hazardous by the OSHA Highly Hazardous Process Safety Standard, 29 CFR 1910.119.

All components are on the U.S. EPA TSCA Inventory List.

CERCLA/SARA Hazardous Substances - Not applicable.
