## RM-10<sup>®</sup> 5004

Reactive separating agent composed of minerals, pH adjusting components, and polymers. A specially blended formula designed to lower pH, break emulsions and remove heavy metals, inks, paints, and high levels of suspended solids from wastewaters generated through processes such as flexo-graphic printing.

## **TECHNICAL SPECIFICATIONS**

| CHARACTERISTICS          |                                 | PARTICLE               |            |
|--------------------------|---------------------------------|------------------------|------------|
|                          |                                 | US Standard Sieve Size | % Retained |
| Color                    | Light Gray                      | 30 mesh                | 60.3       |
| Moisture Content         | 6-9%                            | 50 mesh                | 30.1       |
| Bulk Density (lbs/ft³)   | 70±2                            | 70 mesh                | 3.5        |
| pH (5% dispersion):      | 2.5-4.0                         | 100 mesh               | 1.5        |
| Package sizes available: | 50lb. bags & 2,000lb. bulk bags | 200 mesh               | 2.1        |
|                          |                                 | -200 mesh              | 2.5        |
